

VRAE Monitors

VRAE Model PGM-7800 Series

The VRAE is a powerful, pumped, one- to five-gas monitor capable of monitoring combustibles in the percent by volume range regardless of oxygen levels. The VRAE is capable of monitoring combustibles, oxygen and three toxic gases (PGM-7800) or combustibles and four toxic gases (PGM-7840). Its durable Nickel-Metal-Hydride batteries, powerful internal pump and rugged frame make it ideal for leak detection and site surveys.
